NIGERIA
Lagos
Tin Can Island

An aerial photograph of a wide river with several large, green, forested islands. The water is a deep blue-grey color. The islands are irregularly shaped and covered in dense green vegetation. In the background, some buildings and infrastructure are visible on the riverbank.

PTML

**PORTS & TERMINAL MULTISERVICES LTD
IS THE LARGEST MULTIPURPOSE
RO/RO TERMINAL IN WEST AFRICA,
PROVIDING A UNIQUE COMBINATION OF
RO/RO, CONTAINERIZED AND PROJECT
CARGO SERVICES AT THE SAME FACILITY**

The **35 hectares** (86 acres) terminal includes:

- 500 meters** deep quay
- 3,500 sqm** of Warehouse space
- 8,000 sqm** of Office space
- 10,000 sqm** dedicated Barge area

Our annual throughput exceeds

- 100,000 TEUs**
- 150,000 Vehicles**
- 200,000 tons** of Project and G/Cargo

We are different!

Large enough to cope with volume, but
still providing a customized service.

STORY

THE PORT REVOLUTION

A subsidiary of the Grimaldi Group, PTML commenced operations in 2008, as the first new port development in Nigeria. Doubling the Ro/Ro capacity of the port, the opening of PTML was a decisive factor in eliminating port congestion and improving efficiency in Lagos port.

The Port Terminal

With our own independent Customs Command and separate access Gate, our Terminal is uniquely positioned to offer the fastest cargo delivery time and the easiest access to the port area.

As the sole terminal in Lagos, called by Grimaldi Lines, PTML is serving all major North-South connections, with weekly services from Europe, United States and South America, providing ad-hoc logistics solutions for importers and exporters of Containerized, Ro/Ro and general cargo.

With regular Ro/Ro and general cargo services from Far East, PTML is the ideal gateway to Nigeria.

Over the years PTML has further expanded its capacity, growing beyond the port limits over a dedicated water-front, off-dock facility where cargo is transferred seamlessly through a regular barge service.

Today, with a combined port area of 35 hectares, we're the largest multipurpose Ro/Ro terminal in West Africa.

**Handling over
1,000,000 tons of
containerized, Ro/Ro
and project cargo
every year**

Mile2 Off-Dock Terminal

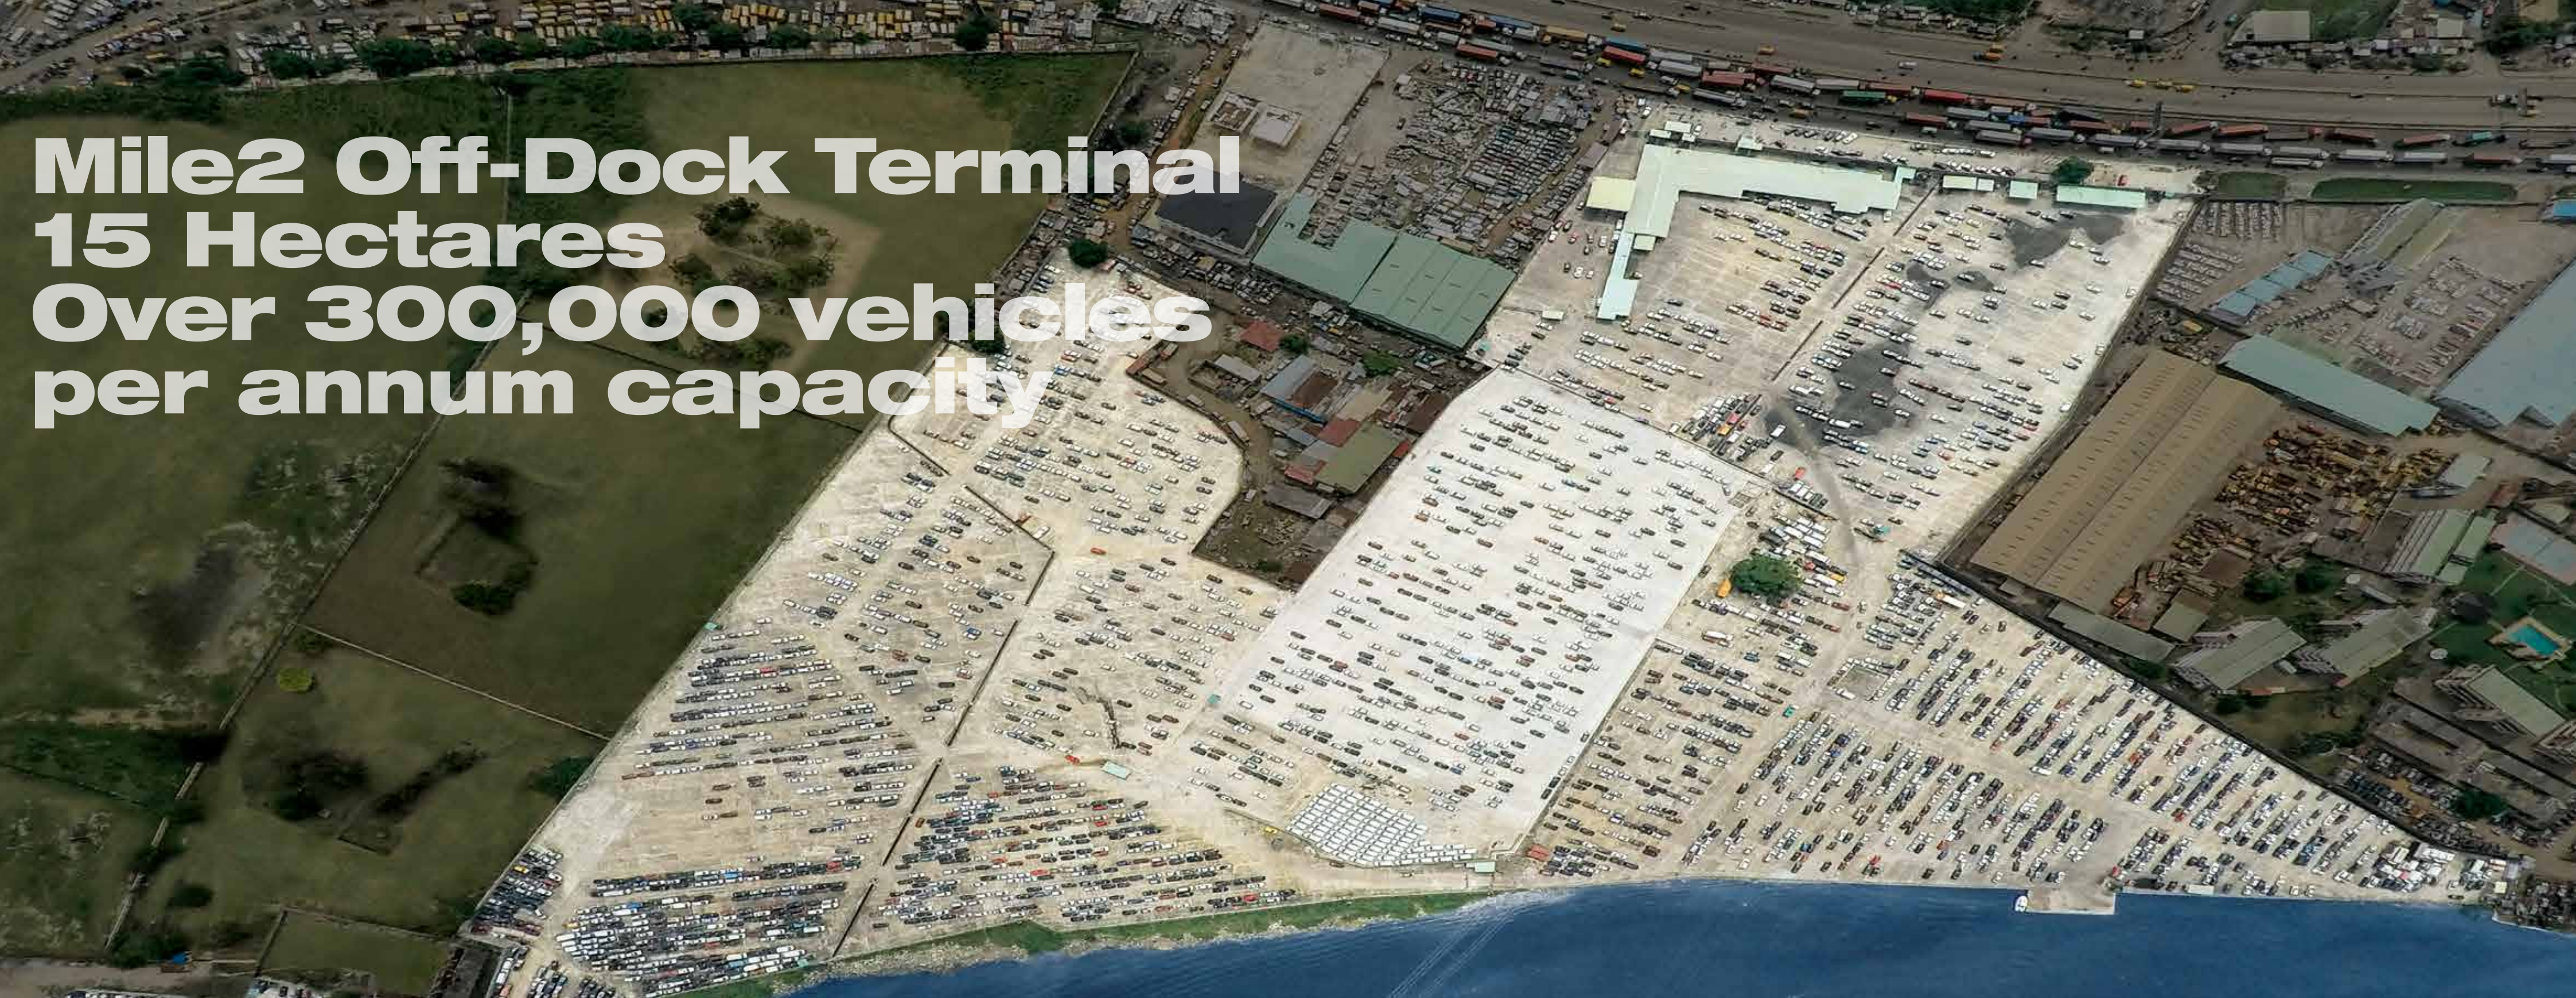

Located 4 nautical miles from Tin Can Island, Mile-2 Off-Dock Terminal, is the natural extension of PTML beyond the limit of the port boundaries.

The terminal has been developed over an area of 15 hectares (37 acres) and is served by environmentally friendly barges, which are transferring the cargo from the PTML port area to this Off-Dock facility.

With the presence of Customs and all other governmental authorities, the importers can process all cargo clearance formalities directly on site, avoiding the congested port area.

Mile2 Off-Dock Terminal
15 Hectares
Over 300,000 vehicles
per annum capacity

PTML EQUIPMENT IN NUMBERS

3 - Barges 40x25 mt \ 1,000 tons

PRO

PROJECT CARGO & CONTAINERS

RO/RO Expertise

PTML handles a wide variety of vehicles from cars to heavy duty equipment including tractors, bulldozers and excavators. Our dedicated deep water Ro/Ro berths and wide aprons make PTML ideal for Ro/Ro vessels to load and discharge cargoes.

Project Cargo and General Cargo Expertise

PMTL has the expertise and the equipment to handle general and project cargo safely and efficiently. From construction equipment, to power plant, from oil and gas material to pipes, paper reels, boats, helicopters and brewery tanks, there is no cargo which is too large or heavy for us to receive. Through our partners we have been offering tailor made solutions to handle cargo weighing over 300 tons.

Project cargo expertise

Export Activity

PTML is the preferred terminal in Tin Can Island for all Export cargo. Providing container stuffing services in the port and having a dedicated Customs Command, greatly simplify the Export process.

Container Expertise

With an annual throughput of over 100,000 TEUs, PTML continues to invest significantly in container handling equipment and innovative solution to guarantee the fastest delivery time obtainable in the Nigerian Port Industry.

VALUE

COMPETITIVE ADVANTAGES

As a world class facility aiming at ensuring the fastest delivery time in the industry and in line with the highest environmental and security standard, PTML has committed significant investments in new state of the art equipment.

Innovation

For the seamless and secure movement of your cargo within the terminal, PTML has developed bespoke solutions which integrate biometric access control and risk management system, CCTV and real time cargo tracking. We are an ISPS compliant facility with a dedicated Customs Command, which guarantees secure and smooth cargo clearance process.

Integrated One-Stop Solution Provider

PTML is the only terminal in Lagos with its own dedicated Customs Command. We have an integrated electronic releasing process with Customs, Shipping Agencies and all other relevant Authorities.

Security Systems and Online Invoicing Payment Platform

PTML is regarded as an innovator in the Nigerian Industry. PTML has successfully developed and enhanced Ro/Ro and container terminal capacity and efficiency by designing and implementing a dedicated electronic data exchange system which comprise a unique real time online invoicing and payment platform to the benefit of Nigerian importers and exporters.

PTML, YOUR PREFERRED PORT TERMINAL IN NIGERIA

The ongoing terminal expansion and our continuous investment in new innovative and reliable e-solutions and platforms, opens up new opportunities to improve cargo turn around time and reduce cost for our clients. We are proud to be a key player in the Nigerian Logistic Industry and we will continue to strive to improve our services to support our customers.

Ports & Terminal Multiservices Ltd is part of the Grimaldi Group, Italy.

Grimaldi is a fully integrated multinational logistics group specialising in maritime transport of cars, rolling cargo, containers and passengers.

The group - wholly owned by the Grimaldi family - is committed to pursuit of excellence, to social responsibilities and to transport solutions which promote an environmentally sustainable mobility.

Sustainability it's our promise.

PTML is focused on improving environmental protection plan. Deployment of barges for cargo transfer is a testimony to the commitment of PTML for environmental friendly alternatives.
